Transmission Service Conditions (TSC) 2018-1	

Dear Sir, Madam,

Today, 27 December 2017, we have published the Transmission Service Conditions (TSC) 2018-1 and appendices on the website of Gasunie Transport Services (GTS). This document contains our general conditions concerning the transmission of gas. In conjunction with the Dutch Network Code the TSC gives a comprehensive overview of the applicable rules. The current Dutch Network Code can be found on our website as well as the website of the Dutch regulatory authority Autoriteit Consument & Markt (ACM).

The TSC 2018-1 contains limited changes compared to the TSC 2017-1:

- The new service capacity conversion is included in article 2.10
- Article 2.12.1 (formerly 2.11.1) is adapted to facilitate trading on the TTF for BBL shippers
- In article 3.2 it is now clarified that the surety we require from a market party who trades at the TTF is related to the imbalance risk that can occur in the GTS portfolio of a shipper

The changes in the TSC 2018-1 are based on Article 6.D.5, Article 6.D.6 or Article 6.D.7 of the TSC. The TSC 2018-1 will enter into force with effect from 1 January 2018.

Please contact our Customer Desk (+31 50 521 3333) if you have any further questions.

Yours sincerely,
GASUNIE TRANSPORT SERVICES B.V.

Karl Vogel
Manager Customer Sales & Service
